About Me

I'm a South Carolina risen iOS developer, currently planted in Dallas Texas. I like to dabble in design in my free time, focusing on making user interfaces appealing for the user. After all, the user experience is what matters most. I like to network and meet new people. Space travel intrigues me. I enjoy learning, and building new projects. I prefer not to waste time on problems that are easily solved. I prefer to get work done.

Projects

BMB Mortgage Calculator - iPad Prototype

This is one of the first projects I was assigned to when I started at Barclays. This prototype never went live, but in my opinion the features were pretty spot on. I am unable to share any source code, but feel free to click the image to the left, to view more screen shots and details about the project.
